These are the findings of an inspection of your facility on the date(s) indicated above:

**Agriculture & Markets Law - Article
26A - Care of Animals by Pet Dealers****Section 401****A. Housing In/Out**1. Primary Enclosure **Critical**

In the large kennel, there are no covers on the electrical outlets in two dog runs, the run containing 'Lotus' & 'General' and the run containing 'Amy' & 'Skylar'. In the run containing 'Vece' the cover on the electrical outlet is covering only 75%, the top portion appears to be pried away assumed by the dog contained in that run.

2. Surfaces **General**

One enclosed stall in the indoor arena used for whelping & nursing puppies has an unsealed 4x4 wood post laying on the floor against the wall where it adjoins the floor. This post shows evidence of being chewed. A few of the other enclosed stalls used for whelping & nursing puppies have areas between and surrounding the rubber mats used for flooring where bedding is caked and dirt floor is exposed. These areas are not impervious and cannot effectively be cleaned and disinfected to prevent the transmission of disease. A few stalls at the front of the barn used to house weaned puppies have walls where the impervious surface has been compromised by the dogs chewing or scratching the surface.
