|---------------------|-----------------|
| 8. Waste & Drainage | <b>Critical</b> |
|---------------------|-----------------|
- Dogs and puppies are unable to avoid own waste. In approximately 5-6 runs, dogs were closed off from access to the outdoor run area of their enclosure and had fecal matter build up in the indoor enclosure where they were housed. One boxer closed off from the outdoor run area of its enclosure had fecal matter within the indoor enclosure. The enclosure contained a large crate bottom that was used as a whelping box for her newborn puppies. The outdoor portion of this enclosure had several areas of dried and smeared feces. Other dogs/puppies housed on wire bottom cages had feces lying on top of the wire. Two of these enclosures housed newborn pups with no whelping box provided. The fecal matter that did fall through the wire was accumulated below the cage. The accumulated feces appeared to be enough to suggest it had not been removed in at least 24 hrs.*
